

Terri L. Ledva, MS

Terri has over two decades of experience within leading pharmaceutical companies across the product life cycle. She has led cross-functional teams that implemented robust healthcare compliance programs, enterprise-wide solutions, new operating models, and corporate integrity agreements by overseeing the reengineering of processes and the development of effective training programs. Collaborating with stakeholders, she has successfully developed and enhanced healthcare compliance programs through the integration of technology and sustainable practices that add business value. Terri also supports change management efforts to drive compliance and appropriate behavior including the planning, development, and distributions of communications to promote organizational awareness and foster adoption. She secures leadership's confidence when new business and technology processes were implemented across all key functions. Terri's strong regulatory knowledge and experience in the development and execution of remediation plans in response to regulatory enforcement informs a 'value-add' approach to compliance.
